*** ENERGY SAVING ELECTRIC RETRO-FITS ***

Huston Electric, Inc. is a privately owned, fourth generation, full service electrical contracting company with divisions specializing in design, build and service work. Our Sign division has two locations, Kokomo and Lafayette, IN, to serve our customers better. The Sign division manufactures and services electric signs, channel lettering, neon signs and vinyl graphics. The Huston Generator division sells MTU Onsite Energy® generators and Atlas Copco® air compressors and service all makes and models. Huston Technologies sells and services NEC® telephone systems, voice mail systems, Control4 and computer data cabling. Huston Electric, Inc. performs over \$30 million dollars of construction per year with more than 160 employees throughout North Central Indiana from their Kokomo and Lafayette offices.

Residential • Light Commercial • Industrial • Health Care • Design Build • Auto CAD Services

With a wide variety of jobs from residential and light commercial to industrial and institutional, Huston Electric, Inc. can provide its customers with a professional electric installation as well as service after the completion of the project.

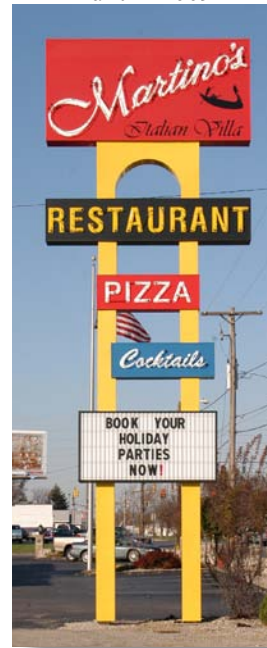

“Serving North Central Indiana for over 70 years!”

Trust In Our Power.

Huston Signs & Services

The Sign division's work dominates the Lafayette and Kokomo area landscapes with installations at many local businesses. We offer a variety of signage including front and reverse lit neon or LED channel letters, **DAKTRONICS** and **watchFire** electronic message centers, Monument style, Marquis and Pole signs. With our in-house design team we also offer unique, custom designed signage. Additionally we have a second-to-none service team equipped with industry leading equipment that offers façade signage and neon treatments and complete service to any signage. Huston Electric's UL® registered manufacturing facility transforms our customers final approved design into steel, glass or any other appropriate material. Our state-of-the-art manufacturing equipment helps us save our customers both time and money without compromising quality or life of the final product.
